

PLANTRONICS

# MCD100M™

## UNIFIED COMMUNICATIONS USB SPEAKERPHONE

### Transform any workspace into a conference room with this compact, yet powerful, speakerphone.

Plantronics presents a portable USB speakerphone ideally suited for ad hoc conference calls in small and medium-sized work areas. The Plantronics MCD100M USB speakerphone boasts a powerful, omni-directional microphone and 360-degree room coverage to ensure that call participants never miss a word. Full-duplex wideband audio enhances UC and VoIP communications and boosts meeting productivity by preventing echo, cut-outs, and excessive background noise. Designed for smooth integration with Microsoft® Office Communicator 2007, the MCD100M lets users dial phone calls right on their PCs. Mute and volume controls enhance usability, and a convenient headphone jack accommodates private calls.

- **360-degree room coverage.** Compact size and omni-directional microphone facilitate full-room audio coverage in medium-sized work spaces.
- **Easy portable plug-and-play.** Connects to any PC via USB cable, without requiring an AC power supply. Transforms your computer into a high-quality wideband audio speakerphone while providing a conference phone in a convenient, portable package.
- **Unified Communications.** Integration with Microsoft Office Communicator 2007, allows you to make calls using online software.
- **Advanced audio quality.** Full-duplex wideband audio, enhanced by powerful DSP technology, improves productivity by reducing echo, cut-outs, and background noise.
- **Call privacy.** A headphone jack provides the option for call privacy.
